Specification Summary

Brand	Hooply
Product type	Container

Product Description

The Hooply Auxiliary Lock for container doors is a robust and reliable locking solution specifically designed for use on steel container doors. As a crucial component of a multipoint locking system, this auxiliary lock works in tandem with internal rods to provide enhanced security for shipping containers, site offices, and steel personnel doors.

Featuring a high-quality satin stainless steel faceplate, this lock is built to withstand harsh outdoor conditions and resist corrosion. At the rear of the lock, a hook mechanism connects directly to the door's internal rods. When the key is turned, this hook operates the system, causing the shootbolt to extend and secure the door.

This auxiliary lock is non-handed (fully reversible), meaning it can be easily installed on both left and right-handed doors without any complex adjustments. Supplied individually boxed, it is an ideal replacement or upgrade for existing Hooply container door locking setups.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** SIDELOCK-KC
- **Part Number:** L30854
- **Finish:** Satin Stainless Steel
- **Handing:** Reversible (Non-handed)
- **Weight:** 250g
- **Pack Quantity:** 1
- **Packaging:** Boxed

Key Features

- **Multipoint Integration:** Connects to internal rods to operate the shootbolt as part of a multipoint locking system.
- **Durable Construction:** Stainless steel faceplate with a satin finish offers excellent corrosion resistance.
- **Reversible Handing:** Non-handed design is suitable for both left and right-handed steel container doors.
- **Compatibility:** Designed specifically to suit Hooply container door systems.

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
