Specification Summary

Brand	Hooply
Product type	Container

Product Description

The Hooply CEFIRO STB01 Side Lock, also known as a lateral lock, is a high-quality auxiliary side lock designed for use with the CEFIRO Combat Lock 31. It is typically connected to the main gearbox using connecting rods, which are supplied separately.

Each auxiliary lock features two heavy-duty shoot bolts. When used in a standard configuration with one lock at the top and one at the bottom, they add four robust locking points to your Hooply CEFIRO 31 Combat Lock system, significantly enhancing overall security.

Please note that this side lock is supplied as a single unit and is not compatible with Latham's stock steel door ranges.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** STB01
- **Faceplate Width:** 38mm
- **Faceplate Height:** 200mm
- **Case Depth:** 87.5mm
- **Case Height:** 100mm
- **Handing:** Reversible
- **Suits Product:** CEFIRO Combat Lock 31
- **Pack Quantity:** 1
- **Weight:** 500g

Key Features

- **Auxiliary Locking:** Designed to work in conjunction with the CEFIRO Combat Lock 31
- **Heavy-Duty Shoot Bolts:** Features two robust shoot bolts to provide strong resistance against forced entry
- **Additional Security:** Adds up to four extra locking points when a top and bottom pair are combined
- **Reversible Handing:** Fully reversible design to suit both left and right-handed doors
- **Gearbox Connection:** Designed to connect to the main gearbox via rods (rods available separately)

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
