Specification Summary

Brand	Hooply
Product type	Escutcheon & Rose

Product Description

The Hooply Cylinder Protector (Oval Cover) is a cost-effective replacement part designed for Hooply handle sets. If your existing cylinder cover is damaged or missing, this protector allows you to restore your door's security and appearance without the expense of replacing the entire handle unit.

Engineered to fit perfectly, the cover slots directly over the euro profile cylinder and sits neatly within the oval cut-out of the external handle plate. This provides an extra layer of physical protection for the cylinder against tampering, making it an essential addition for steel security doors.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** 5586
- **Finish:** Satin Chrome
- **Width:** 42mm
- **Depth:** 17mm
- **Weight:** 100g
- **Compatibility:** Suitable for Hooply handles with an oval cylinder cut-out

Key Features

- **Cost-Effective Solution:** Replaces a damaged or missing cylinder cover without needing to purchase a complete new handle set.
- **Enhanced Security:** Slots over the euro cylinder to protect against tampering and physical attack.
- **Perfect Fit:** Designed specifically to sit flush inside the oval cut-out of compatible Hooply handle plates.
- **Durable Finish:** Supplied in a clean Satin Chrome finish to match existing door furniture.

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
