Specification Summary

Brand	Hooply
Product type	Escutcheon & Rose

Product Description

The HOOPLY GH08 Security Escutcheon is a robust, solid metal security solution designed to protect Euro profile cylinder locks from common forced entry methods, particularly cylinder snapping. By shielding the cylinder and preventing it from being exposed, this escutcheon set significantly reduces the risk of intruders gaining a grip on the lock to snap or extract it.

Featuring a durable solid metal construction and a modern satin nickel finish, the GH08 set consists of a 10mm thick external escutcheon and a 5mm thick internal escutcheon. The two plates are clamped securely together through the door using the supplied heavy-duty bolt-through fixings. With a standard 38mm bolt spacing, this security escutcheon is straightforward to install and provides an immediate, highly visible upgrade to your door's physical security.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** GH08
- **Profile:** Euro Cylinder (cylinder not included)
- **Finish:** Satin Nickel

- **Material:** Solid metal
- **External Escutcheon Thickness:** 10mm
- **Internal Escutcheon Thickness:** 5mm
- **Fixing Type:** Bolt-through
- **Bolt Spacing:** 38mm (distance between centres)
- **Fixing Bolt Dimensions:** 5mm diameter x 55mm length (10mm head diameter)
- **Pack Quantity:** 1

Key Features

- **Anti-Snap Protection:** Shields the Euro cylinder to prevent exposure, defending against cylinder snapping and other physical attacks.
- **Secure Bolt-Through Fixing:** Clamps the internal and external plates tightly through the door, offering superior resistance to tampering and removal.
- **Solid Metal Construction:** Robust and durable build quality designed to withstand forced entry attempts.
- **Sleek Satin Nickel Finish:** Provides a clean, contemporary look that complements modern door hardware.
- **Complete Fixing Kit:** Supplied with 55mm fixing bolts for a secure and straightforward installation.

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
