Specification Summary

Brand	Hooply
Product type	Escutcheon & Rose

Product Description

The Hooply Stainless Steel Adjustable Security Escutcheon is designed to provide robust, additional protection for your Euro cylinder lock. By preventing exposure of the cylinder, this security escutcheon acts as an effective shield against common forced entry methods, such as cylinder snapping and tampering.

Crafted from high-quality stainless steel, this escutcheon set offers excellent durability and corrosion resistance, making it suitable for a wide range of residential and commercial doors. It features an adjustable cylinder protection design that allows for up to 10mm of depth adjustment, ensuring a precise, flush fit against the door face. For enhanced physical security, the escutcheon utilizes a secure bolt-through fixing method, making it extremely difficult for intruders to tamper with or pry the hardware from the door.

Technical Specifications

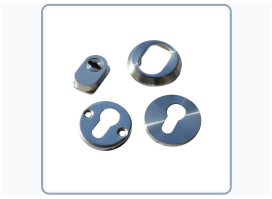

- **Brand:** Hooply
- **Manufacturer Reference:** DCH104-SS
- **Material:** Stainless Steel
- **Finish:** Stainless Steel

- **Diameter:** 52mm
- **Screw Centres:** 39mm
- **Fixing:** Bolt-through
- **Adjustment Range:** Up to 10mm
- **Profile:** Euro Cylinder (cylinder not included)
- **Pack Quantity:** 1

Key Features

- **Cylinder Protection:** Prevents cylinder exposure to protect against cylinder snapping and physical attacks
- **Adjustable Depth:** Offers up to 10mm of adjustment to ensure a flush, secure fit on the door
- **Durable Construction:** Manufactured from high-quality stainless steel for long-lasting performance and corrosion resistance
- **Bolt-Through Fixings:** Provides enhanced resistance to tampering and forced removal
- **Euro Profile Compatibility:** Designed to suit standard Euro cylinder locks

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
