Specification Summary

Brand	Hooply
Product type	Container

Product Description

The Hooply Stainless Steel Container Door Ball Bearing Hinge is a heavy-duty hinge designed specifically for steel container doors. Manufactured from premium Grade 304 stainless steel with a satin finish, this hinge offers exceptional durability and resistance to corrosion, making it ideal for harsh outdoor environments.

Featuring a distinct Z-profile, the hinge is engineered to provide a secure and precise fit on container doors. The integrated ball bearings ensure smooth, effortless door operation even under heavy loads, reducing wear and tear over time. For enhanced security, the hinge is equipped with an anti-knock-out pin, preventing intruders from tampering with or removing the hinge pin to gain entry.

Supplied as a convenient pair, these hinges are a reliable choice for replacing worn components or installing new container doors. Please note that fixings are not included.

Technical Specifications

- **Brand:** Hooply
- **Part Number:** L30859

- **Manufacturer Reference:** HINGE-KC
- **Material:** Grade 304 Stainless Steel
- **Finish:** Satin Stainless Steel
- **Profile:** Z-Profile
- **Length:** 10cm
- **Width:** 10.2cm
- **Depth:** 3mm
- **Height:** 3mm
- **Weight:** 500g
- **Pack Quantity:** 1 Pair
- **Barcode:** 5056240113869

Key Features

- **High-Quality Construction:** Manufactured from Grade 304 stainless steel for superior corrosion resistance and longevity.
- **Smooth Operation:** Integrated ball bearings ensure smooth, reliable opening and closing of heavy steel container doors.
- **Enhanced Security:** Features an anti-knock-out pin to prevent unauthorised removal or tampering.
- **Z-Profile Design:** Specifically shaped to fit steel container doors securely.
- **Convenient Pack:** Supplied as a pair (fixings not included).

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
