Brand	Hooply
Product type	Escutcheon & Rose

Product Description

The Hooply Stainless Steel Cylinder Protector is a robust security upgrade designed specifically to fit Hooply 918902 and 2068 handle sets. Engineered from premium grade 304 stainless steel, this cylinder protector provides strong physical reinforcement for your euro cylinder lock, offering exceptional resistance against common forced entry methods.

By shielding the cylinder, it delivers maximum protection against drilling, heavy impacts, and lock snapping. This makes it an ideal security enhancement for steel doors, shipping container doors, and other high-security

applications where Hooply handles are installed. The durable stainless steel construction ensures long-lasting performance and excellent corrosion resistance, maintaining both security and appearance over time.

Please note that this cylinder protector is designed exclusively for use with Hooply 918902 and 2068 handles. It is supplied as a single unit in boxed packaging, ready for installation.

Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** SS-ESCUTCHEON
- **Material:** Grade 304 Stainless Steel
- **Finish:** Stainless Steel
- **Compatibility:** Suits Hooply 918902 and 2068 handles
- **Weight:** 350g
- **Pack Quantity:** 1

Key Features

- **Robust Cylinder Protection:** Provides strong defense for euro cylinder locks against impact, drill attacks, and lock snapping.
- **Premium Construction:** Manufactured from grade 304 stainless steel for superior strength and corrosion resistance.
- **Targeted Compatibility:** Specifically engineered to fit Hooply 918902 and 2068 handle sets.
- **Enhanced Security:** Ideal for upgrading the security of steel doors and shipping containers.
- **Supplied Boxed:** Delivered as a single, complete unit ready for installation.

Brand Profile

Hooply

HOOPLY is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
