### Product Description

The Hooply Stainless Steel Security Escutcheon is designed to provide robust protection for your euro cylinder lock. By shielding the cylinder, it prevents exposure and significantly reduces the risk of common forced entry methods, such as cylinder snapping and drilling attacks.

Manufactured from high-quality stainless steel, this security escutcheon is highly durable and ideal for external use. It features a secure bolt-through fixing design with standard 38mm screw centres, ensuring a solid, tamper-resistant installation that clamps securely to the door. This set is designed to accommodate standard Euro profile cylinders (available separately) and is supplied boxed with the necessary fixings.

Whether you are upgrading the security on a residential door or a commercial steel door, the Hooply SCH102-SS escutcheon offers a simple yet highly effective security upgrade.

## Technical Specifications

- **Brand:** Hooply
- **Manufacturer Reference:** SCH102-SS
- **Part Number:** L30863
- **Material:** Stainless Steel

- **Finish:** Stainless Steel
- **Profile:** Euro Cylinder (cylinder not included)
- **Fixing Type:** Bolt-through
- **Screw Centres:** 38mm
- **Pack Quantity:** 1
- **Weight:** 350g

## Key Features

- **Cylinder Protection:** Prevents exposure of the cylinder to defend against snapping and drilling attacks.
- **Durable Construction:** Manufactured from robust stainless steel for excellent strength and weather resistance.
- **Bolt-Through Fixings:** Provides enhanced security by securely clamping the escutcheon plates from both sides of the door.
- **Standard Compatibility:** Features standard 38mm screw centres to suit a wide range of doors and lock cases.
- **Complete Set:** Supplied boxed with necessary fixings for a straightforward installation.

## Brand Profile

Hooply

**HOOPLY** is a specialist door-hardware brand that shows up a *lot* in the world of **steel security doors** and **shipping/container doors**. In the trade, HOOPLY is basically shorthand for that very specific ecosystem of **68mm-centre lockcases, handles, and multipoint "gearbox" setups** that you see on site cabins, compounds, plant rooms, and steel personnel doors.

What HOOPLY makes (the practical identity):

- **Multipoint centre cases / gearboxes** for steel doors and container door multi-lock systems (often described as "key operated latch + multiple deadbolts").
- **Door handle sets** designed around those systems, commonly taking a **euro cylinder**, and often featuring an internal **thumbturn/snib** for privacy/deadlocking functions.
- Associated **container/steel door hardware** like **hinges** (including stainless ball-bearing hinges with anti-knockout details) and other fittings.

Why HOOPLY is so common:

- It's become a de-facto standard in certain door types, where the key measurements recur constantly (e.g. **68mm centres** and common fixing patterns).
- It's very "trade reality"-driven: straightforward replacement parts, predictable fitment, and lots of off-the-shelf compatibility with steel door sets and container conversions.
