Specification Summary

Brand	Hoppe
Product type	Letter Plate

Product Description

The HOPPE Arrone Suited 310mm Letter Plate (AR708A) is a premium, stylish, and highly durable solution designed to complement modern entrance doors. Part of HOPPE's co-ordinated suited range, this letter plate can be perfectly matched with other door hardware, such as handles and door knockers, to create a unified aesthetic for your home.

Constructed from robust zinc, it features a sprung sleeve and flap that snaps shut after use, helping to reduce draughts and enhance home security. It is designed to suit uPVC, composite, and timber doors with a thickness ranging from 44mm to 70mm.

This letter plate is available in six high-quality finishes, including Anthracite Grey, Black, Polished Brass, Polished Chrome, Satin Chrome, and White, and can be ordered in various boxed quantities. Please choose your preferred finish and quantity from the options below.

Brand Profile

Hoppe

The company was founded on **5 November 1952** by **Friedrich Hoppe** in **Heiligenhaus near Düsseldorf**, initially as a small building-hardware production business during the post-war construction boom. From there it grew into an international group, expanding manufacturing and sales across Europe and beyond.

Today HOPPE describes itself as an **owner-managed family business** and a **European market leader** in the development, production, and marketing of **door and window handles**. The group operates with **20+ sites on three continents** and **around 2,300 employees**, with the owning family (including **Wolf, Christoph, and Christian Hoppe**) leading the business across the 2nd and 3rd generations.

In product terms, HOPPE is widely used across **residential and commercial** projects for:

- **Door handle sets** (lever handles, roses/backplates, security furniture variants)
- **Window handles** (including lockable models and systems for different window profiles)
- Finishes and specialist surfaces designed for high-use environments

One of their better-known specialist options is **SecuSan®**, an **antimicrobial surface finish** for door and window handles that's designed to **suppress the growth of bacteria, algae, and fungi** and is marketed as maintenance-free for long-term use—particularly relevant for healthcare, education, and other high-touch public settings.
