## Product Description

The HOPPE Edinburgh Long Plate Lever Handle Furniture is a high-quality, durable door handle set designed for both domestic and commercial applications. Manufactured from lightweight yet robust aluminium, these straight lever handles feature a clean Satin Anodised Aluminium (SAA) finish that resists tarnishing and corrosion, ensuring long-lasting performance and a modern aesthetic.

This particular model is a lever lock set, featuring a standard keyhole cut-out on a 154mm long backplate, making it ideal for use with standard UK sashlocks. Designed for internal doors with a thickness ranging from 20mm to 40mm, it is supplied as a complete pair. The package includes wood screws for straightforward face-fix installation along with a solid spindle, making it a reliable and stylish choice for both new installations and retrofitting.

## Brand Profile

Hoppe

The company was founded on **5 November 1952** by **Friedrich Hoppe** in **Heiligenhaus near Düsseldorf**, initially as a small building-hardware production business during the post-war construction boom. From there it grew into an international group, expanding manufacturing and sales across Europe and beyond.

Today HOPPE describes itself as an **owner-managed family business** and a **European market leader** in the development, production, and marketing of **door and window handles**. The group operates with **20+ sites on three continents** and **around 2,300 employees**, with the owning family (including **Wolf, Christoph, and Christian Hoppe**) leading the business across the 2nd and 3rd generations.

In product terms, HOPPE is widely used across **residential and commercial** projects for:

- **Door handle sets** (lever handles, roses/backplates, security furniture variants)
- **Window handles** (including lockable models and systems for different window profiles)
- Finishes and specialist surfaces designed for high-use environments

One of their better-known specialist options is **SecuSan®**, an **antimicrobial surface finish** for door and window handles that's designed to **suppress the growth of bacteria, algae, and fungi** and is marketed as maintenance-free for long-term use—particularly relevant for healthcare, education, and other high-touch public settings.
