Specification Summary

Brand	Hoppe
Product type	Lever Furniture

Product Description

The HOPPE Edinburgh Short Plate Lever Handle Furniture is a high-quality, durable door handle solution designed for internal doors. Combining a clean, contemporary aesthetic with robust performance, these straight lever handles are ideal for both domestic and light commercial applications.

Crafted from lightweight yet durable aluminium, this set features a sleek Satin Anodised Aluminium (SAA) finish that offers excellent resistance to corrosion and daily wear. The compact 103mm short backplate provides a neat, minimalist appearance on the door face, making it a perfect choice for modern interiors.

Designed for straightforward installation, the handles are suitable for internal doors with a thickness ranging from 20mm to 40mm. They are supplied in pairs and come complete with the necessary wood screws for quick and easy face-fixing.

Brand Profile

Hoppe

The company was founded on **5 November 1952** by **Friedrich Hoppe** in **Heiligenhaus near Düsseldorf**, initially as a small building-hardware production business during the post-war construction boom. From there it grew into an international group, expanding manufacturing and sales across Europe and beyond.

Today HOPPE describes itself as an **owner-managed family business** and a **European market leader** in the development, production, and marketing of **door and window handles**. The group operates with **20+ sites on three continents** and **around 2,300 employees**, with the owning family (including **Wolf, Christoph, and Christian Hoppe**) leading the business across the 2nd and 3rd generations.

In product terms, HOPPE is widely used across **residential and commercial** projects for:

- **Door handle sets** (lever handles, roses/backplates, security furniture variants)
- **Window handles** (including lockable models and systems for different window profiles)
- Finishes and specialist surfaces designed for high-use environments

One of their better-known specialist options is **SecuSan®**, an **antimicrobial surface finish** for door and window handles that's designed to **suppress the growth of bacteria, algae, and fungi** and is marketed as maintenance-free for long-term use—particularly relevant for healthcare, education, and other high-touch public settings.
