Specification Summary

Brand	Hoppe
Product type	Spindle

Product Description

The HOPPE Metal Spindle Sleeve Adaptor is a simple and effective solution for door hardware compatibility issues. This square metal sleeve is designed to slide easily over an existing 7mm spindle, increasing its external width to 8mm.

By converting a 7mm spindle to 8mm, this adaptor allows you to fit modern door handles, locks, or latches that require an 8mm follower without needing to replace the entire spindle. Manufactured from durable metal, it provides a secure, reliable fit and is incredibly easy to install.

Technical Specifications

- **Brand:** Hoppe
- **Manufacturer Reference:** 2160551
- **Length:** 30mm
- **Width:** 8mm
- **Material:** Metal
- **Weight:** 10g
- **Pack Quantity:** 1

Key Features

- **Spindle Conversion:** Easily converts a 7mm square spindle to an 8mm width.
- **Simple Installation:** Slides directly over your existing spindle for a quick and hassle-free fit.
- **Durable Construction:** Made from robust metal to ensure long-lasting reliability.
- **Cost-Effective:** Avoids the need to replace entire locksets or spindle assemblies when upgrading door furniture.

Brand Profile

Hoppe

The company was founded on **5 November 1952** by **Friedrich Hoppe** in **Heiligenhaus near Düsseldorf**, initially as a small building-hardware production business during the post-war construction boom. From there it grew into an international group, expanding manufacturing and sales across Europe and beyond.

Today HOPPE describes itself as an **owner-managed family business** and a **European market leader** in the development, production, and marketing of **door and window handles**. The group operates with **20+ sites on three continents** and **around 2,300 employees**, with the owning family (including **Wolf, Christoph, and Christian Hoppe**) leading the business across the 2nd and 3rd generations.

In product terms, HOPPE is widely used across **residential and commercial** projects for:

- **Door handle sets** (lever handles, roses/backplates, security furniture variants)
- **Window handles** (including lockable models and systems for different window profiles)
- Finishes and specialist surfaces designed for high-use environments

One of their better-known specialist options is **SecuSan®**, an **antimicrobial surface finish** for door and window handles that's designed to **suppress the growth of bacteria, algae, and fungi** and is marketed as maintenance-free for long-term use—particularly relevant for healthcare, education, and other high-touch public settings.
