Specification Summary

Brand	Hoppe
Product type	Miscellaneous

Product Description

The HOPPE Spare Replacement Spindle is a high-quality, traditional solid spindle designed to restore or maintain the smooth operation of your door handles. Measuring 8mm x 140mm, this solid metal spindle is ideal for use with uPVC door handles, including HOPPE and Ferco handle sets, as well as many other compatible brands.

By connecting the interior and exterior handles through the door mechanism, it ensures reliable engagement with the lock. The generous 140mm length is suitable for thicker door profiles and can easily be cut down to size on-site to achieve a precise, custom fit for your specific door thickness. It is a cost-effective alternative to replacing the entire handle set when only the spindle has worn or failed.

Technical Specifications

- **Brand:** HOPPE
- **Manufacturer Reference:** 519194
- **Part Number:** L28744
- **Spindle Size:** 8mm square
- **Length:** 140mm (14cm)
- **Finish:** Silver

- **Weight:** 30g
- **Pack Quantity:** 1

Key Features

- **Solid Construction:** Durable metal body ensures dependable transmission of handle rotation.
- **Versatile Compatibility:** Designed for standard 8mm square profile handle sets, including HOPPE and Ferco.
- **Trimmable Length:** The 140mm length can be cut down on-site to fit various door thicknesses.
- **Cost-Effective Repair:** Ideal spare or replacement part to restore handle function without replacing the entire unit.
- **Traditional Design:** Classic solid spindle construction for reliable, long-term use.

Brand Profile

Hoppe

The company was founded on **5 November 1952** by **Friedrich Hoppe** in **Heiligenhaus near Düsseldorf**, initially as a small building-hardware production business during the post-war construction boom. From there it grew into an international group, expanding manufacturing and sales across Europe and beyond.

Today HOPPE describes itself as an **owner-managed family business** and a **European market leader** in the development, production, and marketing of **door and window handles**. The group operates with **20+ sites on three continents** and **around 2,300 employees**, with the owning family (including **Wolf, Christoph, and Christian Hoppe**) leading the business across the 2nd and 3rd generations.

In product terms, HOPPE is widely used across **residential and commercial** projects for:

- **Door handle sets** (lever handles, roses/backplates, security furniture variants)
- **Window handles** (including lockable models and systems for different window profiles)
- Finishes and specialist surfaces designed for high-use environments

One of their better-known specialist options is **SecuSan®**, an **antimicrobial surface finish** for door and window handles that's designed to **suppress the growth of bacteria, algae, and fungi** and is marketed as maintenance-free for long-term use—particularly relevant for healthcare, education, and other high-touch public settings.
