Product type	ICS

Product Description

The ICS 500ZLDC is a premium architectural Z&L bracket designed specifically for use with ICS Standard Magnets. Engineered for inward-opening door applications, this bracket set provides a secure and highly adjustable mounting solution for your access control system.

Constructed from high-grade aluminium with a sleek satin anodised finish, the 500ZLDC features architectural covers. These covers neatly conceal unsightly wiring and fixings, delivering a clean, professional, and aesthetically pleasing installation. It is ideal for commercial, public, and residential environments where both security and appearance are paramount.

Designed for surface-mount installation, this robust bracket set includes Z-plates and an L-bracket to offer multiple fitting options, ensuring a precise fit on a variety of inward-opening doors.

Brand Profile

ICS

ICS Security (ICS Security Solutions Ltd) is a UK access-control hardware brand and supplier focused on the “nuts and bolts” of electronic door control: **maglocks, electric locks/bolts, strikes, lock releases, and packaged locking kits** designed to make access-control installs cleaner and more reliable. They describe themselves as an access-control specialist founded in **2003**, with **20+ years** in the sector.

They operate from **Blisworth, Northamptonshire** (Units 1–2, JBJ Business Park, Northampton Road, NN7 3DW), supporting trade customers with a range that covers the common building blocks of access control systems.

Product-wise, ICS’s catalogue is very “installer reality”:

- **Magnetic locks** in multiple formats (standard, slimline/transom, stainless, monitored, with door status options), typically running **12–24V DC selectable** and specced by holding force (e.g., 600–1200 lbs and up).
- **Electric locks / bolts and locking kits**, including “compliant lock packages” that bundle the parts needed for controlled entry with free egress, calling out standards like **EN179 / EN1125** in their kit descriptions.
- A broader access-control “system parts” approach: they position the range as covering “all parts of access control systems,” aiming to let installers choose a complete solution from one source.
