Specification Summary

Brand	ICS
Product type	ICS

Product Description

The ICS U300ZL is a high-quality Mini Z&L bracket designed specifically for mounting ICS Mini Magnets on inward-opening doors. This bracket set provides a secure and reliable solution for surface-mounted access control installations, offering multiple adjustment options to ensure a precise fit.

Manufactured from durable aluminium with a professional Satin Anodised Aluminium finish, the U300ZL is built to withstand daily use while maintaining a clean, modern aesthetic. The set includes Z plates measuring 160mm x 50mm and an L bracket measuring 250mm x 30mm, providing the necessary versatility to accommodate various door and frame configurations.

This bracket is ideal for commercial or residential properties looking to install or upgrade an electromagnetic locking system on inward-opening doors.

Brand Profile

ICS

ICS Security (ICS Security Solutions Ltd) is a UK access-control hardware brand and supplier focused on the “nuts and bolts” of electronic door control: **maglocks, electric locks/bolts, strikes, lock releases, and packaged locking kits** designed to make access-control installs cleaner and more reliable. They describe themselves as an access-control specialist founded in **2003**, with **20+ years** in the sector.

They operate from **Blisworth, Northamptonshire** (Units 1–2, JBJ Business Park, Northampton Road, NN7 3DW), supporting trade customers with a range that covers the common building blocks of access control systems.

Product-wise, ICS’s catalogue is very “installer reality”:

- **Magnetic locks** in multiple formats (standard, slimline/transom, stainless, monitored, with door status options), typically running **12–24V DC selectable** and specced by holding force (e.g., 600–1200 lbs and up).
- **Electric locks / bolts and locking kits**, including “compliant lock packages” that bundle the parts needed for controlled entry with free egress, calling out standards like **EN179 / EN1125** in their kit descriptions.
- A broader access-control “system parts” approach: they position the range as covering “all parts of access control systems,” aiming to let installers choose a complete solution from one source.
