Specification Summary

Brand	ICS
Product type	ICS

Product Description

The ICS U520S is a surface-mounted armature housing designed specifically to fit the ICS Standard Series of electromagnetic locks. Constructed from durable aluminium and finished in a clean satin anodised aluminium (SAA), this housing provides a secure, neat, and professional mounting solution for the armature plate on surface-mounted door installations.

It is ideal for access control applications where a standard surface-mount setup is required, ensuring the armature plate is robustly held in place to align perfectly with the magnet.

Technical Specifications

- **Manufacturer Reference:** U520S
- **Material:** Aluminium
- **Finish:** Satin Anodised Aluminium
- **Fitting:** Surface mount
- **Width:** 175mm
- **Depth:** 15mm
- **Weight:** 300g

- **Guarantee:** 1 Year

Key Features

- **Tailored Compatibility:** Designed specifically to suit the ICS Standard Series magnets
- **Durable Construction:** Made from high-quality aluminium for reliable, long-term performance
- **Clean Aesthetics:** Satin anodised aluminium finish provides a professional look that blends with modern doors
- **Simple Installation:** Designed for straightforward surface-mount applications

Brand Profile

ICS

ICS Security (ICS Security Solutions Ltd) is a UK access-control hardware brand and supplier focused on the “nuts and bolts” of electronic door control: **maglocks, electric locks/bolts, strikes, lock releases, and packaged locking kits** designed to make access-control installs cleaner and more reliable. They describe themselves as an access-control specialist founded in **2003**, with **20+ years** in the sector.

They operate from **Blisworth, Northamptonshire** (Units 1–2, JBJ Business Park, Northampton Road, NN7 3DW), supporting trade customers with a range that covers the common building blocks of access control systems.

Product-wise, ICS’s catalogue is very “installer reality”:

- **Magnetic locks** in multiple formats (standard, slimline/transom, stainless, monitored, with door status options), typically running **12–24V DC selectable** and specced by holding force (e.g., 600–1200 lbs and up).
- **Electric locks / bolts and locking kits**, including “compliant lock packages” that bundle the parts needed for controlled entry with free egress, calling out standards like **EN179 / EN1125** in their kit descriptions.
- A broader access-control “system parts” approach: they position the range as covering “all parts of access control systems,” aiming to let installers choose a complete solution from one source.
