Product type	ICS

Product Description

The ICS UGDB14 Glass Door Bracket is a robust and stylish glass door saddle designed to mount the armature plate of an ICS Mini Magnet. Specifically engineered to fit the ICS Mini magnet L bracket, this bracket is the ideal solution for securing glass doors without the need for drilling or complex modifications.

Constructed from high-quality aluminium with a professional satin anodised finish, it provides a clean, modern aesthetic that complements contemporary commercial and residential interiors. It is suitable for glass doors up to 14mm thick, ensuring a secure and stable fit for your access control system.

Brand Profile

ICS

ICS Security (ICS Security Solutions Ltd) is a UK access-control hardware brand and supplier focused on the “nuts and bolts” of electronic door control: **maglocks, electric locks/bolts, strikes, lock releases, and packaged locking kits** designed to make access-control installs cleaner and more reliable. They describe themselves as an access-control specialist founded in **2003**, with **20+ years** in the sector.

They operate from **Blisworth, Northamptonshire** (Units 1–2, JBJ Business Park, Northampton Road, NN7 3DW), supporting trade customers with a range that covers the common building blocks of access control systems.

Product-wise, ICS’s catalogue is very “installer reality”:

- **Magnetic locks** in multiple formats (standard, slimline/transom, stainless, monitored, with door status options), typically running **12–24V DC selectable** and specced by holding force (e.g., 600–1200 lbs and up).
- **Electric locks / bolts and locking kits**, including “compliant lock packages” that bundle the parts needed for controlled entry with free egress, calling out standards like **EN179 / EN1125** in their kit descriptions.
- A broader access-control “system parts” approach: they position the range as covering “all parts of access control systems,” aiming to let installers choose a complete solution from one source.
