Specification Summary

Brand	Ingersoll
Product type	Accessory

Product Description

The Ingersoll RA71 20 staple is a genuine replacement keep designed for use with the Ingersoll SC71 and SC73 rim automatic deadlocks. This robust staple is specifically engineered for inward opening doors, providing a secure and reliable latching point to maintain the high-security performance of your lock.

This replacement staple is available in multiple finishes, including Chrome Plated, Polished Brass, and Satin Chrome, allowing you to seamlessly match your existing door hardware. Depending on the finish selected, the weight ranges from 210g to 230g, and the manufacturer reference is listed as either RA/71/20 or RA71 STAPLE.

Please select your preferred finish, manufacturer reference, weight, and barcode from the options below to find the perfect match for your door.

Brand Profile

Ingersoll

Ingersoll is a historic **British high-security lock brand**, best known for its distinctive **rim nightlatches** and the long-running **SC71**—a “signature” product whose chunky look and unique key profile are basically part of the brand’s identity. Ingersoll Locks Limited states it was **founded in 1949** and has focused on security-led lock design ever since.

A key part of the origin story centers on inventor **Jack W. Taylor**, who (according to a detailed brand history) conceived the idea for a **ten-lever cylinder** in **1944**, and the Ingersoll range grew from that high-security cylinder concept.

In today’s market, “Ingersoll” is still used as shorthand for **serious, mechanical, front-door security**—the kind of lock people pick when they want something robust, familiar to locksmiths, and not dependent on batteries, apps, or vibes.

Ownership-wise, the **Ingersoll trademark/manufacturer is described as being owned by the ASSA ABLOY Group** (noting this is stated by a specialist distributor/reseller who explicitly separates themselves from the trademark owner).
