Specification Summary

Brand	Ingersoll
Product type	Accessory

Product Description

The Ingersoll RA71 20B staple (also referred to as a keep or strike plate) is a high-quality accessory designed specifically to facilitate the installation of Ingersoll locks on outward opening doors.

This staple is compatible with the Ingersoll SC71 and SC73 high-security rim nightlatches. By replacing the standard inward-opening staple, the RA71 20B allows these robust automatic deadlocks to be securely fitted to doors that open outwards, ensuring you do not have to compromise on home or commercial security.

Manufactured by Ingersoll, this replacement keep features a durable construction with a sleek chrome-plated finish, offering both reliable strength and a clean, professional appearance that matches your existing door hardware.

Technical Specifications

- **Brand:** Ingersoll
- **Manufacturer Reference:** RA71/20B
- **Finish:** Chrome Plated
- **Weight:** 60g
- **Compatibility:** Ingersoll SC71 and SC73 nightlatches
- **Door Type:** Outward opening doors

Brand Profile

Ingersoll

Ingersoll is a historic **British high-security lock brand**, best known for its distinctive **rim nightlatches** and the long-running **SC71**—a “signature” product whose chunky look and unique key profile are basically part of the brand’s identity. Ingersoll Locks Limited states it was **founded in 1949** and has focused on security-led lock design ever since.

A key part of the origin story centers on inventor **Jack W. Taylor**, who (according to a detailed brand history) conceived the idea for a **ten-lever cylinder** in **1944**, and the Ingersoll range grew from that high-security cylinder concept.

In today’s market, “Ingersoll” is still used as shorthand for **serious, mechanical, front-door security**—the kind of lock people pick when they want something robust, familiar to locksmiths, and not dependent on batteries, apps, or vibes.

Ownership-wise, the **Ingersoll trademark/manufacturer is described as being owned by the ASSA ABLOY Group** (noting this is stated by a specialist distributor/reseller who explicitly separates themselves from the trademark owner).
