0		EG: VBE******	Yes

Product Description

Get your replacement or spare ISEO F6 keys cut to code by our Master Locksmiths. The ISEO F6 6-pin cylinder system uses a code engraved directly onto the head of the key, allowing for precise and hassle-free duplication online.

To order, simply locate the unique code stamped on your original key head. A typical code format consists of three letters followed by six numbers, such as 'VBE 123456'. Enter this exact code in the provided box, select the quantity you require, and our expert locksmiths will handle the rest.

For security reasons, we highly recommend having your keys delivered to an alternative address (such as a workplace or a relative's home) rather than the property where the locks are installed.

Technical Specifications

- **Manufacturer:** ISEO
- **Cylinder Type:** 6-pin vertical key system
- **Code Format:** Typically three letters followed by six numbers (e.g., VBE 123456)
- **Key Type:** ISEO F6 code key

Key Features

- **Cut to Code:** Order replacement keys easily using the code engraved on your original key head
- **Master Locksmith Cut:** Professionally cut by qualified Master Locksmiths for guaranteed accuracy
- **Convenient Ordering:** Simple online process to get spare keys without needing to send your original key to us

Brand Profile

ISEO

ISEO (often written **ISEO Serrature**) is an Italian access-solutions manufacturer best known for **cylinders, locks, padlocks, panic/escape hardware, and mechatronic + digital access control**. The group is headquartered in **Pisogne (Brescia), Northern Italy**, on the shores of **Lake Iseo**—which is where the name comes from.

The company was **founded in 1969** by **Giuseppe Facchinetti**, originally producing **locks, cylinders and padlocks** before expanding into broader access control. Today, ISEO presents itself as a global access-control player with **1,000+ employees**, a presence in **100+ countries**, **13 branches**, and **4 manufacturing plants** (listed as Italy, France, Germany, and Romania).

Where ISEO gets especially relevant for modern installs is the bridge between **mechanical security** and **connected access**. Their “Connected Smart / ARGO” ecosystem is marketed for residential and light-commercial sites, using an app-centric approach to manage access and operate compatible devices like electronic cylinders (e.g., **Libra**).
