Product Description

Get your replacement or spare ISEO R6+ Plus dimple keys cut to code by the experts at Lock & Key Centre. As Registered Master Locksmiths, we cut and supply your keys on genuine ISEO blanks to ensure a perfect fit and smooth operation, preventing potential damage to your lock cylinder.

The ISEO R6+ Plus system features high-security dimple keys that are easily identified by a unique security code. This code is typically engraved directly onto the key head (or bow) and is also supplied on the security card that came with your original lock. For the R6+ Plus series, this code begins with the letters 'AMB' or 'AML'.

To order, simply enter your unique 'AMB' or 'AML' key code into the provided box, select the quantity of keys you require, and add them to your basket. For your peace of mind and security, we highly recommend having your keys delivered to an alternative address, such as a workplace or a relative's home.

Brand Profile

ISEO

ISEO (often written **ISEO Serrature**) is an Italian access-solutions manufacturer best known for **cylinders, locks, padlocks, panic/escape hardware, and mechatronic + digital access control**. The group is headquartered in **Pisogne (Brescia), Northern Italy**, on the shores of **Lake Iseo**—which is where the name comes from.

The company was **founded in 1969** by **Giuseppe Facchinetti**, originally producing **locks, cylinders and padlocks** before expanding into broader access control. Today, ISEO presents itself as a global access-control player with **1,000+ employees**, a presence in **100+ countries**, **13 branches**, and **4 manufacturing plants** (listed as Italy, France, Germany, and Romania).

Where ISEO gets especially relevant for modern installs is the bridge between **mechanical security** and **connected access**. Their “Connected Smart / ARGO” ecosystem is marketed for residential and light-commercial sites, using an app-centric approach to manage access and operate compatible devices like electronic cylinders (e.g., **Libra**).
