Product Description

Get high-quality replacement keys for your ISEO R6 cylinder locks, cut precisely to code. The ISEO R6 is a popular reversible dimple key system commonly used on uPVC and composite doors.

To order, simply locate the unique code printed on the head of your existing ISEO R6 key and enter it into the box provided before selecting your required quantity. We can cut keys within the following specific code ranges:

- ABF000001 to ABF015328
- ABL000001 to ABL015328

- ACY000001 to ACY015328
- AGL000001 to AGL015328

Security Advice from Master Locksmiths

As Master Locksmiths, we strongly recommend choosing the DPD tracked delivery option at checkout. We also advise having your replacement keys shipped to an alternative address - such as your workplace, a friend, or a family member - rather than the property where the locks are fitted.

To maintain maximum security, all keys are shipped discreetly without any customer details or address information inside the package.

Technical Specifications

- **Key Type:** Reversible dimple key
- **Manufacturer:** ISEO
- **Compatible Lock Series:** ISEO R6 cylinders
- **Supported Code Ranges:**
  - ABF000001 - ABF015328
  - ABL000001 - ABL015328
  - ACY000001 - ACY015328
  - AGL000001 - AGL015328

Key Features

- **Cut to Code:** Professionally cut using the unique code printed on the head of your original key
- **Reversible Design:** Convenient dimple key design that operates the lock regardless of which way up it is inserted
- **Discreet Shipping:** Keys are packaged securely with no internal customer details or address information to ensure maximum security
- **Enhanced Security Recommendations:** Expert advice to ship to a neutral address (such as a workplace) to safeguard your property

Brand Profile

ISEO

ISEO (often written **ISEO Serrature**) is an Italian access-solutions manufacturer best known for **cylinders, locks, padlocks, panic/escape hardware, and mechatronic + digital access control**. The group is headquartered in **Pisogne (Brescia), Northern Italy**, on the shores of **Lake Iseo**—which is where the name comes from.

The company was **founded in 1969** by **Giuseppe Facchinetti**, originally producing **locks, cylinders and padlocks** before expanding into broader access control. Today, ISEO presents itself as a global access-control player with **1,000+ employees**, a presence in **100+ countries**, **13 branches**, and **4 manufacturing plants** (listed as Italy, France, Germany, and Romania).

Where ISEO gets especially relevant for modern installs is the bridge between **mechanical security** and **connected access**. Their “Connected Smart / ARGO” ecosystem is marketed for residential and light-commercial sites, using an app-centric approach to manage access and operate compatible devices like electronic cylinders (e.g., **Libra**).
