Brand	Unknown
Product type	Rim Cylinders

Product Description

The ISEO R6 Rim Cylinder is a high-quality, reliable security solution manufactured in Italy using advanced CNC machinery. Designed to provide enhanced security for residential and commercial doors, this cylinder features a robust 6-pin mechanism, making it significantly more difficult to pick than standard 5-pin alternatives.

Engineered for durability and attack resistance, the R6 is equipped with hardened steel pins in the cylinder body and stainless steel pins to protect against drilling. It operates using a robust 2.85mm thick reversible dimple key, offering smooth and convenient operation.

Tested to 200,000 cycles, this rim cylinder far exceeds standard BS EN 1303 requirements, ensuring long-lasting performance. It is highly versatile and can be ordered keyed to differ, keyed alike, or as part of a custom master keyed suite designed and produced in the UK.

Technical Specifications

- **Cylinder Type:** Rim Cylinder
- **Number of Pins:** 6-pin mechanism
- **Key Type:** 2.85mm thick reversible dimple key
- **Testing Standard:** Tested to 200,000 cycles (exceeds BS EN 1303 requirements)
- **Keying Options:** Keyed to differ, keyed alike, or master keyed
- **Keys Supplied:** 3 keys (Keyed to Differ) or 2 keys (Keyed Alike / Master Keyed)
- **Origin:** Manufactured in Italy

Key Features

- **Enhanced Drill Resistance:** Features stainless steel pins and a hardened steel pin in the cylinder body to protect against drill attacks.
- **Pick Protection:** The 6-pin configuration provides superior pick resistance compared to standard 5-pin cylinders.
- **High Precision Manufacturing:** Produced using highly automated CNC machinery in Italy for exceptional dimensional accuracy.
- **Reversible Key Design:** Supplied with a flat, reversible dimple key for convenient, easy insertion.

- **Versatile Keying Solutions:** Ideal for individual use or integration into bespoke master key suites designed and assembled in the UK.
