Specification Summary

Brand	Keylex
Product type	Keylex

Product Description

The Keylex 2100 Series is a heavy-duty, high-security mechanical digital lock designed for external door installations and high-traffic environments where extreme use is expected. This robust lock is ideal for demanding applications, including military, police, and fire service installations.

Featuring a proven heavy-duty design, the Keylex 2100 is equipped with a built-in slipping clutch mechanism that protects the lock furniture from forced attacks and vandalism, ensuring many years of reliable service. The lock operates entirely mechanically, removing the need for batteries or electrical wiring, and offers over 16,000 possible code combinations with up to 14 buttons.

For convenience and safety, the lock features a free exit function, allowing immediate egress from the inside without code entry. It also includes a passage function to allow free passage from both sides at the user's discretion. The satin chrome finish and robust construction make it highly weather-resistant and suitable for both internal and external doors.

Technical Specifications

- **Brand:** Keylex
- **Manufacturer Reference:** K2100K.76.SC
- **Mechanism:** Mechanical Digital
- **Backset:** 76mm
- **Case Depth Required:** 114mm
