Specification Summary

Brand	KeySecure
Product type	Key Cabinet

Product Description

The KeySecure KS Combination Key Cabinet (KS20) offers a secure, reliable, and highly organised solution for managing up to 20 keys. Perfect for both commercial and domestic environments, this robust cabinet is designed to keep your keys safe while ensuring they remain easily accessible to authorised users.

At the heart of this cabinet is a dial-style mechanical combination lock. Offering up to 1 million possible combinations (differs), it provides excellent keyless protection without the need for physical keys or batteries. The durable steel body is finished in a hard-wearing grey powder coating, ensuring long-lasting resistance to daily wear and tear.

Inside, the cabinet features four adjustable, colour-coded hook bars. These clip-in bars can be easily repositioned or removed entirely to accommodate larger keys or bulky key bunches. To make key identification quick and simple, the cabinet is supplied with matching colour-coded, numbered key tags that correspond directly to the hook bars.

Technical Specifications
