Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The KICKSTOP 2004 Universal StapleGuard is a heavy-duty, bolt-through door frame reinforcer designed to protect wooden door frames from forced entry and kick-in attacks. Often referred to as a London Frame Reinforcer, this short version of a London Bar provides superior strength by reinforcing the frame around the staple (keep) of a cylinder nightlatch or rim lock.

The StapleGuard consists of two steel plates that bolt securely together through the door frame using four security bolts. The flat external plate features a bevelled edge to resist side impacts, while the internal plate features a universal 'D' shaped staple. This universal design fits over lock staples measuring up to 30mm x 97mm. Thanks to its adjustable fixings, the internal size can be adjusted between 70mm and 97mm, making it the ideal choice if you

are unsure whether your door requires a standard or large staple guard.

Finished in a clean white polyester powder coating, the KICKSTOP 2004 offers a neat, professional appearance while delivering robust physical security.

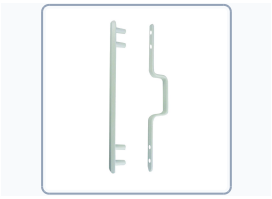

Technical Specifications

- **Length:** 300mm
- **Width:** 20mm
- **Depth:** 5mm
- **Staple Width:** 30mm
- **Staple Length:** Adjustable from 70mm to 97mm
- **Finish:** White
- **Pack Quantity:** 1
- **Material:** Steel

Key Features

- **Universal 'D' Shape Staple:** Fits over lock staples up to 30mm x 97mm, with adjustable internal sizing between 70mm and 97mm.
- **Heavy-Duty Reinforcement:** Strengthens wooden door frames around the nightlatch or rim lock keep to resist kick-in attacks.
- **Bolt-Through Security:** Two steel plates bolt together through the frame with four high-security bolts for maximum resistance.
- **Bevelled External Plate:** The flat outer plate features a bevelled edge designed to deflect side-impact force.
- **Versatile Fit:** Suitable for most sizes of staple, eliminating the guesswork between standard and large sizes.
- **Durable Finish:** Supplied in a clean, white polyester powder-coated finish.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
