Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop Universal London Bar is a highly effective steel door frame reinforcing bar designed to protect wooden doors against forced entry, kicking, and splitting. Fitted to the internal face of the lock side of the frame, this robust bar features a 'D' shaped staple that fits securely over the keep (staple) of a surface-mounted rim lock or cylinder nightlatch.

This universal version is the ideal solution if you are unsure whether you require a standard or large staple size. It features an adjustable staple size (ranging from 30x70mm to 30x97mm) using the included fixings, allowing you to easily reduce the size to fit your specific lock.

Manufactured from a single continuous piece of 5mm thick solid steel with rounded edges and countersunk holes, it ensures a flush, secure fit without unsightly welds. It is supplied complete with a packet of 2.5-inch No.10 hardened steel woodscrews.

This product is available in multiple widths, weights, barcodes, and manufacturer references (2009 or 2010). Please choose your preferred options from the selection below.

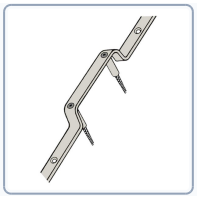

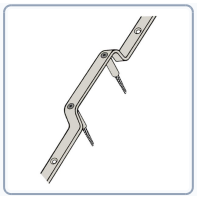

Technical Specifications

- **Length:** 1.83m (can be cut down to size)
- **Width:** 16mm or 20mm (please choose from the options below)
- **Thickness:** 5mm
- **Material:** Steel
- **Finish:** White
- **Staple Size:** Adjustable from 30mm x 70mm to 30mm x 97mm
- **Manufacturer Reference:** 2009 or 2010 (please choose from the options below)
- **Weight:** 1.284kg or 1.64kg (please choose from the options below)
- **Barcode:** Multiple options available (please choose from the options below)
- **Suitable For:** Wooden door frames with surface-mounted rim locks or nightlatches

Key Features

- **Universal Adjustable Staple:** Easily adjusts from 30x70mm to 30x97mm to fit standard or large lock keeps, making it ideal if you are unsure of the size needed.
- **Robust Reinforcement:** Strengthens timber door frames against kicking, splitting, and forced entry.
- **Premium Construction:** Made from 5mm thick solid steel with rounded edges and countersunk holes for a flush, professional finish.
- **No Unsightly Welds:** Manufactured from a continuous length of high-grade steel.
- **Fixings Included:** Supplied with a packet of 2.5-inch No.10 hardened steel woodscrews.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
