Specification Summary

Brand	Kickstop
Product type	Lock Guard

Product Description

The Kickstop 9600 LockGuard is a high-quality door reinforcer designed to strengthen wooden doors around a traditional mortice lock, euro cylinder, or oval cylinder. Installing a mortice lock requires removing wood from the door, which can leave a weakened area susceptible to kick-in attacks and forced entry. The LockGuard reinforces this vulnerable area by bolting two plates together through the door, providing robust security and a clean,

professional finish.

As the shortest model in Kickstop's LockGuard range, the 9600 is ideal for doors where space is limited or where locks are fitted close together, preventing the use of longer guards like the 9601. It features two bolt-through security fixings with 150mm screw centres.

This product is available in a wide selection of finishes and mechanism profiles to suit your existing door hardware. Please choose your preferred finish, mechanism type, and packaging option from the selection below.

Technical Specifications

- **Brand:** Kickstop
- **Length:** 188mm (18.8cm)
- **Width:** 35mm
- **Thickness:** 7mm
- **Screw Centres:** 150mm
- **Weight:** 476g
- **Mechanism:** Euro Cylinder, Oval Cylinder, or UK Mortice (please select below)
- **Finish:** Black, Chrome Plated, Polished Brass, Polished Chrome, Satin Chrome, Satin Silver, or White (please select below)
- **Packaging:** Bagged or Visi (please select below)

Key Features

- **Door Reinforcement:** Strengthens and reinforces wooden doors around the lock area to resist kick-in attacks and forced entry.
- **Compact Design:** At 188mm long, it is ideal for doors with limited space or closely positioned locks.
- **Secure Fixing:** Features two bolt-through security fixings with 150mm screw centres for robust installation.
- **Neat Finish:** Provides a clean, professional aesthetic while covering any minor installation damage.
- **Versatile Options:** Available in multiple finishes and mechanism profiles to match your existing door hardware.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
