Specification Summary

Brand	Kickstop
Product type	Lock Guard

Product Description

The Kickstop 9601 300mm LockGuard is a high-security door reinforcement plate designed to strengthen wooden doors around mortice locks and cylinder setups. By sandwiching the door with robust plates bolted securely through the timber, it significantly reinforces the vulnerable area around the lock against physical attacks and forced entry, whilst providing a neat and tidy finish.

This 300mm long guard is available in multiple configurations to suit different locking mechanisms, including Euro Cylinder, Oval Cylinder, and UK Mortice options. To complement your existing door hardware, it is available in a range of finishes including Black, Polished Brass, Polished Chrome, Satin Chrome, Satin Silver, and White. Depending on the mechanism and finish selected, the plate width is available in 29mm or 35mm, with weights ranging from 752g to 850g.

Please choose your preferred mechanism, finish, and width from the options below to ensure the correct fit for your door.

Technical Specifications

- **Length:** 300mm (30cm)
- **Thickness/Diameter:** 7mm
- **Width:** 29mm or 35mm (please choose from the options below)
- **Mechanism Compatibility:** Euro Cylinder, Oval Cylinder, or UK Mortice (please choose from the options below)
- **Finishes:** Black, Polished Brass, Polished Chrome, Satin Chrome, Satin Silver, or White (please choose from the options below)
- **Fixings:** 4 bolt-through high-security fixings
- **Weight:** 752g to 850g (depending on option selected)
- **Pack Quantity:** 1

Key Features

- **Robust Reinforcement:** Strengthens and reinforces wooden doors around traditional mortice locks and cylinder setups to resist forced entry
- **High-Security Fixings:** Features 4 heavy-duty bolt-through fixings for maximum resistance against physical attack
- **Neat Finish:** Provides a clean and tidy aesthetic, covering existing damage or preventing future wear around the lock area
- **Versatile Options:** Available in a wide variety of profiles, widths, and finishes to seamlessly match your existing door hardware

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
