Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 9603 and 9604 Stapleguards are heavy-duty, bolt-through door frame reinforcers designed to strengthen wooden door frames. Functioning as a robust, bolt-through version of a London Bar, these plates are fitted over the lock's staple or keep to reinforce the frame around a rim cylinder nightlatch or lever rim lock.

By bolting together through the frame, they provide exceptional resistance against forced entry and kick-in attacks, spreading the force of an impact across a wider area of the timber. The external plate features a bevelled edge designed to resist side impact, while the internal plate features a 'D' shaped staple that fits over the lock's keep.

These Stapleguards are available in multiple finishes, manufacturer references, and staple lengths to suit different lock sizes and aesthetic preferences. Please choose from the available options below to select your preferred finish (Polished Brass or White), manufacturer reference (9603WH or 9604PB), staple length (70mm or 97mm), and barcode.

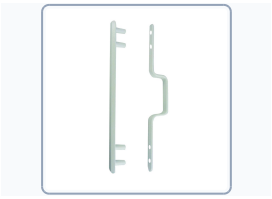

Technical Specifications

- **Length:** 30cm (300mm)
- **Width:** 20mm
- **Thickness:** 7mm
- **Staple Width:** 30mm
- **Staple Length:** 70mm or 97mm (please choose from the options below)
- **Finish:** Polished Brass or White (please choose from the options below)
- **Manufacturer Reference:** 9603WH or 9604PB (please choose from the options below)
- **Barcode:** 5026457000245 or 5026457000535 (please choose from the options below)
- **Pack Quantity:** 1
- **Packaging:** Bagged

Key Features

- **Frame Reinforcement:** Strengthens wooden door frames around the staple (keep) of a rim cylinder nightlatch or lever rim lock.
- **Bolt-Through Design:** Two plates bolt together securely through the door frame for maximum strength.
- **Impact Resistant:** External plate features a bevelled edge to resist side impact and forced entry.
- **Multiple Options:** Available in standard (70mm) or large (97mm) staple lengths and a choice of finishes to match your door hardware.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
