Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 16mm London Door Bar is a highly effective, heavy-duty steel reinforcing bar designed to strengthen wooden door frames against forced entry. Wooden door frames are often the weakest point during a forced "kick-in" attack, prone to splitting where the rim lock or nightlatch keep is mounted. This London Bar features a 'D' shaped staple that fits over and secures the existing lock keep, reinforcing the frame and distributing force to prevent splitting.

Manufactured from high-grade 5mm thick solid steel with rounded edges, this bar provides robust protection. It is designed to be screwed directly to the internal face of the door frame, with countersunk holes ensuring a flush, neat finish.

This product is available in a variety of configurations to suit your door's dimensions and lock type. Please choose from the options below to select your preferred length, finish, and staple size.

Technical Specifications

- **Bar Width:** 16mm
- **Bar Thickness:** 5mm
- **Lengths Available:** 61cm or 1.98m (please choose from the options below)
- **Finishes Available:** Brasslux, Brown, or White (please choose from the options below)
- **Staple Lengths Available:** 70mm, 97mm, or 105mm (please choose from the options below)
- **Staple Widths Available:** 30mm or 40mm (please choose from the options below)
- **Weight:** 436g to 1.284kg (depending on size selected)
- **Material:** High-grade flat steel with rounded edges
- **Fixing Holes:** Countersunk for flush-fitting screws

Key Features

- **Frame Reinforcement:** Strengthens wooden door frames around the keep of a surface-mounted rim lock or cylinder nightlatch
- **Kick-In Protection:** Helps resist kicking, splitting, and forcing open of the door
- **Robust Construction:** Manufactured from 5mm thick solid steel with no unsightly welding
- **Flush Fitting:** Countersunk fixing holes ensure screw heads sit flush with the surface of the bar
- **Versatile Options:** Available in multiple lengths, finishes, and staple sizes to suit your specific door and lock setup (please select below)

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
