Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 9607 & 9610 20mm London Door Bar is a heavy-duty door frame reinforcing bar designed to strengthen wooden door frames against forced entry, kicking, and splitting. This solid steel bar is fitted to the internal face of the lock side of the frame, featuring an integrated 'D' shaped staple that fits over and secures the staple (keep) of a surface-mounted rim lock or cylinder nightlatch.

Manufactured from high-grade, 5mm thick flat steel with rounded edges, this bar provides robust security while maintaining a neat, flush appearance thanks to its countersunk fixing holes. It is available in a choice of finishes and staple sizes to suit your specific door setup and hardware. Please select your preferred finish, staple length, and manufacturer reference from the options below.

Technical Specifications

- **Brand:** Kickstop
- **Width:** 20mm
- **Thickness:** 5mm
- **Length:** 1.98m (1980mm)
- **Staple Width:** 30mm
- **Staple Length:** 70mm (Standard) or 97mm (Large) - please choose from the options below
- **Finish:** Available in Brown or White - please choose from the options below
- **Manufacturer Reference:** 9607BN, 9607WH, 9610BRN, or 9610WH - please choose from the options below
- **Barcode:** Multiple options available - please choose from the options below
- **Weight:** 1.64kg
- **Pack Quantity:** 1

Key Features

- **Frame Reinforcement:** Strengthens and reinforces wooden door frames around the rim lock or nightlatch to resist kicking and forced entry.
- **Integrated 'D' Staple:** Designed to fit securely over the staple/keep of a surface-fitted rim lock or cylinder nightlatch.
- **High-Quality Construction:** Manufactured from 5mm thick solid flat steel with rounded edges for strength and safety.
- **Flush Fitting:** Features countersunk fixing holes to ensure screw heads sit flush with the surface of the bar.
- **Durable Finish:** Polyester powder-coated finish available in multiple options to match your interior decor.
- **Versatile Options:** Available in standard (70mm) or large (97mm) staple lengths and multiple finishes - please select your required configuration below.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
