Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 9612 & 9613 London Door Bar is a highly effective door frame reinforcing bar designed specifically to suit the Ingersoll SC71 nightlatch. This robust steel anti-burglary device is screwed onto the internal face of the door frame on the lock side, reinforcing wooden frames against kicking, splitting, and forced entry.

Crafted from 5mm thick solid steel with rounded edges, the bar features a 'D' shaped staple designed to fit over the staple (keep) of your Ingersoll SC71 nightlatch (with a maximum staple size of 30mm x 70mm). This modified staple features a cut-out to allow the lock's springbolt to pass through smoothly.

This product is supplied handed to suit either left or right-handed applications. Please select your required handing and manufacturer reference from the options below:

- **Left Hand (9612BN):** For doors where the lock is fitted on the right-hand side (when viewed from the inside).
- **Right Hand (9613BN):** For doors where the lock is fitted on the left-hand side (when viewed from the inside).

Technical Specifications

- **Length:** 1.98m (78")
- **Width:** 16mm
- **Thickness:** 5mm
- **Staple Size:** 30mm x 70mm (maximum)
- **Material:** Solid steel
- **Finish:** Dark Brown
- **Handing:** Left Hand (9612BN) or Right Hand (9613BN) (please choose from the options below)
- **Fixings:** Supplied with 2.5" No.10 hardened steel woodscrews

Key Features

- **Ingersoll SC71 Compatibility:** Specifically designed with a modified 'D' shaped staple to fit over the keep of the Ingersoll SC71 nightlatch.
- **Frame Reinforcement:** Strengthens wooden door frames against kicking, splitting, and forced entry.
- **Solid Steel Construction:** Made from 5mm thick solid steel with rounded edges for strength and a clean appearance.
- **Flush Fitting:** Features countersunk fixing holes to ensure screw heads sit flush with the bar.
- **Handed Options:** Available in Left Hand and Right Hand versions to suit your door configuration (please choose from the options below).
- **Fixings Included:** Supplied with a packet of 2.5-inch long No.10 hardened steel woodscrews.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
