Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 9614 16mm Birmingham Door Bar is a heavy-duty, flat steel security bar designed to reinforce and strengthen wooden door frames against forced entry and kick-in attacks. This dual-purpose bar is primarily used to strengthen the hinge side of the door frame on inward-opening doors. Additionally, it can be used on the locking side of the frame if only mortice locks are fitted (where no rim lock staple is present).

Manufactured from high-grade, 5mm thick solid steel, the bar features rounded edges for a neat finish and countersunk fixing holes to ensure screws sit flush with the surface. It is finished with a durable polyester powder coating, available in both White and Brown finishes to suit your door frame. Please select your preferred finish, manufacturer reference, and barcode from the options below.

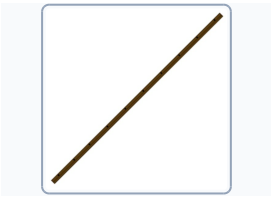

Technical Specifications

- **Brand:** Kickstop
- **Manufacturer Reference:** 9614WH / 9614BRN (please select from the options below)
- **Length:** 1.98m (1980mm)
- **Width:** 16mm
- **Thickness:** 5mm
- **Material:** High-grade solid steel
- **Finish:** Polyester powder coated (available in White or Brown - please select below)
- **Fixing Holes:** Countersunk for flush fitting
- **Weight:** 1.284kg
- **Pack Quantity:** 1

Key Features

- **Frame Reinforcement:** Significantly strengthens wooden door frames to resist kick-in attacks and burglary.
- **Dual-Purpose Design:** Ideal for reinforcing the hinge side of inward-opening doors, or the locking side when only mortice locks are installed.
- **Durable Construction:** Made from robust 5mm thick flat steel with rounded safety edges.
- **Flush Fitting:** Features countersunk holes to ensure fixing screws sit flush with the bar for a clean, snag-free finish.
- **Finish Options:** Available in White or Brown polyester powder-coated finishes to match your existing decor - please select below.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
