Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 9615 Birmingham Door Bar is a highly effective, heavy-duty security solution designed to reinforce and strengthen wooden door frames. Traditional wooden frames are vulnerable to splitting and splintering during a forced "kick-in" attack. This solid steel bar significantly increases resistance to forced entry, making it highly recommended by crime prevention specialists.

Manufactured from 5mm thick, superior-grade solid steel, this 20mm wide bar features rounded edges and countersunk screw holes, ensuring the fixing screws sit completely flush with the surface for a neat, snag-free finish. It is primarily used to protect the hinge side of inward-opening doors, but can also be fitted to the lock side if no rim lock staple is present. For outward-opening doors, it can be mounted externally to resist chisel and jemmy attacks.

The bar is supplied in a clean white finish and comes complete with hardened steel woodscrews for straightforward installation.

Technical Specifications

- **Brand:** Kickstop
- **Manufacturer Reference:** 9615WH
- **Length:** 1980mm (1.98m)
- **Width:** 20mm
- **Thickness:** 5mm
- **Material:** Solid steel
- **Finish:** White
- **Weight:** 1.64kg
- **Pack Quantity:** 1

Key Features

- **Frame Reinforcement:** Significantly strengthens wooden door frames to resist forced entry and "kick-in" attacks.
- **Flush Fitting:** Features countersunk screw holes so that the screw heads sit flush with the flat bar.
- **Solid Steel Construction:** Manufactured from 5mm thick, superior-grade solid steel with rounded sides.
- **Versatile Application:** Ideal for the hinge side of inward-opening doors, the lock side (where no rim lock staple is present), or externally on outward-opening doors.
- **Complete Package:** Supplied with countersunk hardened steel woodscrews for installation.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
