Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The KICKSTOP 9617 20mm London Door Bar is a robust door frame reinforcing bar designed to protect wooden door frames from forced entry. When a door is kicked or forced, the timber frame around the rim lock or nightlatch is highly vulnerable to splitting. This heavy-duty steel anti-burglary device is screwed onto the internal face of the lock side of the frame, providing essential reinforcement to resist physical attacks.

This 9617 version features a large 'D' shaped staple designed to fit over the staple (keep) of a surface-fitted rim lock or cylinder nightlatch, accommodating staple sizes of up to 30mm x 97mm. Manufactured from 5mm thick solid steel with rounded edges and countersunk fixing holes, it ensures a flush, secure fit.

This London Door Bar is available in multiple finishes, including Brasslux, Dark Brown, and White, with corresponding manufacturer references and barcodes. Please choose your preferred option from the selection below.

Technical Specifications

- **Length:** 61cm (610mm)
- **Width:** 20mm
- **Thickness:** 5mm
- **Staple Dimensions:** 30mm (Width) x 97mm (Length)
- **Material:** Solid steel
- **Finishes:** Available in Brasslux, Dark Brown, or White (please select from the options below)
- **Manufacturer References:** 9617BLX, 9617BN, or 9617WH (please select from the options below)
- **Barcodes:** Multiple options available (please select from the options below)

Key Features

- **Enhanced Security:** Reinforces wooden door frames to resist kicking, splitting, and forced entry
- **Large 'D' Shaped Staple:** Designed to fit over the keep of a surface-mounted rim lock or nightlatch
- **Robust Construction:** 5mm thick solid steel bar with rounded edges for strength and safety
- **Flush Installation:** Countersunk holes allow the fixing screws to sit flush with the bar
- **Complete Kit:** Supplied with 2.5-inch No.10 hardened steel woodscrews for secure installation

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
