Specification Summary

Brand	Kickstop
Product type	Door Bar

Product Description

The Kickstop 9630 16mm London Door Bar is a highly effective, heavy-duty security solution designed to reinforce wooden door frames against forced entry. Wooden frames are notoriously vulnerable to splitting and splintering during a "kick-in" attack. This solid steel bar is designed to fit over the staple (keep) of an existing surface-mounted rim lock or cylinder nightlatch, significantly strengthening the lock side of the frame.

Manufactured from a single continuous length of 5mm thick, superior-grade steel, the London Bar features a prominent 'D' shaped staple designed to accommodate extra-large keeps measuring up to 40mm x 105mm. It is finished with rounded edges for a neat appearance and features countersunk fixing holes, allowing the supplied 2.5-inch hardened steel woodscrews to sit completely flush.

Easy to install on the internal face of the door frame, this 1.98m (78") bar provides robust, visible, and physical protection. Depending on the height of your existing lock, the bar can be easily cut to length with a hacksaw during installation to ensure a perfect fit.

Technical Specifications

- **Brand:** Kickstop
- **Manufacturer Reference:** 9630BN (L31594)
- **Length:** 1.98m (78")
- **Width:** 16mm
- **Thickness:** 5mm
- **Staple Size:** 40mm x 105mm (Extra Large)
- **Finish:** Dark Brown
- **Material:** Solid steel
- **Weight:** 1.284kg
- **Fixings:** Supplied with 2.5" No.10 hardened steel woodscrews

Key Features

- **Frame Reinforcement:** Strengthens wooden door frames to resist kicking, splitting, and forced entry.
- **Extra-Large 'D' Staple:** Designed to fit over larger rim lock or nightlatch keeps up to 40mm x 105mm.
- **Premium Construction:** Made from 5mm thick solid steel with rounded edges and no unsightly welding.
- **Flush Fitting:** Features countersunk screw holes to ensure the screw heads sit flush with the bar.
- **Customisable Length:** Can be cut to size with a hacksaw to accommodate varying lock heights.
- **Complete Kit:** Supplied with high-strength hardened steel woodscrews for immediate installation.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
