Specification Summary

Brand	Kickstop
Product type	Anti Thrust Plate

Product Description

The Kickstop AT4 Full Length Anti-Thrust Plate is designed to provide robust protection against jemmying and forced entry on outward opening doors. Measuring 1980mm in length, this full-height steel plate covers the vulnerable gap between the door and the frame, preventing intruders from inserting crowbars, screwdrivers, or other tools to attack the locking mechanism.

This blank door edge protector features no lock cut-outs, offering a clean, continuous shield. It is supplied with high-security Sentinel countersunk wood screws, which are designed to prevent unauthorised removal once installed. The plate is 3mm thick and 80mm wide, offering heavy-duty physical security without compromising the door's operation.

This product is available in multiple finishes, including Satin Chrome and White. Please choose your preferred finish and manufacturer reference from the options below to suit your door's aesthetic.

Technical Specifications

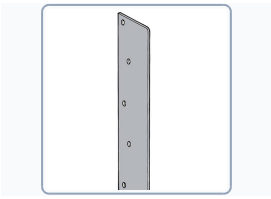

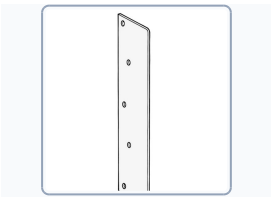

- **Length:** 1.98m (1980mm)
- **Width:** 80mm
- **Depth (Thickness):** 3mm

- **Weight:** 3.6kg
- **Handing:** For outward opening doors
- **Fixings:** Supplied with Sentinel security screws
- **Finishes:** Available in Satin Chrome or White (please select from the options below)
- **Manufacturer Reference:** AT4SS or AT4WH (please select from the options below)

Key Features

- **Full-Height Protection:** 1980mm length covers the entire height of the door gap to prevent jemmying attacks.
- **Blank Design:** No lock cut-outs, providing a continuous, uninterrupted security barrier.
- **High-Security Fixings:** Supplied with Sentinel security screws to prevent tampering or unauthorised removal.
- **Heavy-Duty Construction:** Made from robust 3mm thick steel plate for maximum physical strength.
- **Easy Installation:** Features countersunk holes for a flush, professional finish.
- **Aesthetic Options:** Available in multiple finishes to match your existing door hardware.

Brand Profile

Kickstop

Kickstop is a UK burglary-prevention hardware brand specialising in **secondary door security** for **timber doors and frames**. It's basically the "stop your door being kicked in" ecosystem: steel reinforcers, anti-jemmy plates, and frame-strengthening bars designed to deal with the ugly truth that a traditional timber door often fails at the **frame/keep area** long before the lock itself gives up.

The range was **devised in 1988** by a **family firm of locksmiths and security retailers in East London**, after seeing a growing trend of burglars simply **kicking in** doors. Their premise is simple: morticing and lock fitting removes wood and **weakens the door/edge**, so reinforcing those stress points dramatically increases resistance to forced entry.

What Kickstop is known for (the stuff you'll actually fit):

- **London Bar** – a heavy steel **door-frame reinforcing bar** that secures the area around the **nightlatch/rim lock keep (staple)** to resist splitting and forced opening.
- **Birmingham Bar** – a flat reinforcing strip used to strengthen the frame on the hinge side (or lock side where relevant), also marketed for resisting **jemmy/chisel attacks** on outward-opening doors when fixed externally with security screws.
- **LockGuard / Door Reinforcer plates** – bolt-through steel plates that reinforce the door around **mortice deadlocks/sashlocks** (UK lever, euro, oval), targeting the weakened section created by cutting in the lockcase.
- **StapleGuard** and other keep/strike reinforcers – focused protection for the **frame keep zone**, supplied with security fixings and offered in multiple sizes/finishes.
- **Anti-thrust / anti-jemmy plates** – overlap plates for outward-opening doors, designed to resist levering and prying, sold as part of what they claim is the **largest commercially available** anti-thrust range.

Kickstop positions itself as having **Britain’s largest range** of these reinforcement-style, crime-prevention products, aimed at both the **trade** and competent DIY installs. In short: it’s not “a lock brand,” it’s “make the door and frame stop behaving like wet cardboard under attack.”
