Specification Summary

Brand	Lowe & Fletcher
Product type	Furniture Lock

Product Description

The Lowe & Fletcher 1605 Locking Knob is a versatile and reliable locking solution designed for a wide range of applications, including metal office furniture, cupboards, cabinets, and doors. Featuring a high-quality satin chrome finish paired with a durable black plastic grip, this locking knob combines modern aesthetics with practical, everyday functionality.

Operating with a smooth 90-degree anti-clockwise movement, the L&F 1605 is easy to grip and turn. It utilizes the popular 92 key series and offers up to 200 different locking combinations (differs) to ensure reliable security for your personal or professional storage. Each locking knob is supplied with two keys, making it a convenient and secure choice for upgrading or replacing existing cabinet locks.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
