Specification Summary

Brand	Lowe & Fletcher
Product type	Nut Fix

Product Description

The Lowe & Fletcher 2106 Nut Fix 20mm Camlock is a reliable, high-quality locking solution designed for a wide range of applications, including metal and wooden office furniture, cabinets, lockers, and postboxes. Featuring a robust 20mm body length and a standard double D mounting hole shape, this camlock provides a secure fit and straightforward installation.

Finished in bright chrome with a smart conical, round face, it blends seamlessly with modern office and domestic storage. This model is keyed to differ, offering up to 2,000 differs for enhanced security, and is supplied with two keys from the double-entry 66-68 key series. The secure nut fixing ensures the lock remains firmly in place, making it an excellent replacement or upgrade for your existing cabinet or postbox locks.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
