Specification Summary

Brand	Lowe & Fletcher
Product type	Combination

Product Description

The Lowe & Fletcher 2800 Mechanical Combination Lock is a robust and versatile keyless security solution designed for lockers, office furniture, and personal storage cabinets. Constructed from durable zinc die-cast with a high-quality powder-coated finish, this 4-wheel combination lock offers up to 10,000 unique, user-definable combinations, eliminating the hassle of lost keys.

This model features reversible handing, making it suitable for both left- and right-hand doors. It is fitted with a 45mm cam and includes an innovative code-finding function that allows for emergency access and combination recovery in the event of a forgotten code. Setting and changing the PIN code is quick and simple using the integrated button. With its compact 56mm diameter and robust design, it is an ideal choice for retrofitting or new installations in offices, schools, and leisure facilities.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
