Specification Summary

Brand	Lowe & Fletcher
Product type	Straight

Product Description

The Lowe & Fletcher 5825 Double Claw Cupboard Lock is a versatile, high-quality multi-point locking solution designed to secure office and home furniture. Featuring a robust double claw mechanism, this lock is ideal for use on cupboards, drawers, desks, and sliding-door tambour units, including TBS Metrix systems.

Constructed with a polished chrome face and a durable black plastic backplate, the lock combines reliable security with a clean, professional finish. It operates smoothly via a 180-degree clockwise key turn and is supplied complete with two keys. With 200 key differs available, it is a practical choice for multi-desk office environments or home storage setups requiring individual security.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
