Specification Summary

Brand	Lowe & Fletcher
Product type	Furniture Lock

Product Description

The Lowe & Fletcher 5861 Sliding Door Lock is a reliable, high-quality push-to-lock solution designed specifically for wooden sliding doors on cabinets, cupboards, and office furniture. Featuring a convenient push-to-lock bolt mechanism, this lock allows for quick and secure locking without needing a key to engage the bolt.

With a durable chrome-plated finish, this compact lock blends seamlessly with modern wooden furniture. It features a 26mm body length and a 22mm nozzle diameter, with a cylinder projection of 26mm when closed and 37mm when open.

Operating on the reliable 18 key series, the lock offers up to 200 distinct locking combinations (differs) for enhanced security. Each lock is supplied with two keys. For larger commercial installations or bespoke requirements, Keyed Alike (KA) and Master Keyed (MK) suites are available as special orders.

Brand Profile

Lowe & Fletcher

Lowe & Fletcher is a long-established British manufacturer of **locking systems for industry**, best known for high-volume, application-specific locks like **camlocks, quarter-turns, compression locks, and electronic/keypad solutions** used on things like **enclosures, cabinets, lockers, post/parcel units, and industrial equipment**. They're a **sixth-generation, family-owned** business with roots going back to **1889**, when **John Lowe and Thomas Fletcher** founded a lockmaking firm in **Willenhall** in the Black Country—one of the historic heartlands of UK lockmaking.

Today, Lowe & Fletcher forms part of the **Lowe & Fletcher Group**, which describes two main divisions: **Locking Systems** (industrial/OEM locks) and **Fire Safety** (smoke and fire containment systems).

Operationally, their Locking Systems division includes UK operations based around the West Midlands (e.g., **Wednesbury, WS10 7DE**) and they state they have multiple operational sites across Europe and the US to serve local and specialist markets.

On the product side, their camlock range alone spans **mini camlocks, standard camlocks, slamlocks, and IP-rated water-resistant variants** (with application-driven options like tool/coin operation and different cam geometries).
