## Product Description

The Lockey 1150 Series Lever Handle Digital Lock is a heavy-duty mechanical push-button lock designed to offer reliable, keyless access control for both internal and external doors. Featuring a robust satin chrome finish, this weather-resistant digital lock is built to withstand high-traffic use and harsh environmental conditions.

Equipped with an ergonomic lever handle on both sides, the Lockey 1150 ensures effortless operation. The outside handle requires a correct 4-to-6-digit code for entry, while the inside handle provides a free exit at all times. For added convenience, the lock features a passage set facility, allowing the door to be left unlocked for unrestricted access when required.

To protect against vandalism and forced entry, the lever handles feature a slipping clutch mechanism that slips under pressure to prevent internal damage. Inside, Teflon-coated components ensure smooth operation and long-lasting durability. The lock is fully reversible, making it suitable for both left and right-handed doors with a thickness between 35mm and 55mm.

## Technical Specifications

- **Backset:** 60mm
- **Case Depth Required:** 88mm
- **Door Thickness:** 35mm to 55mm
- **Code Length:** 4 to 6 digits
- **Combinations:** 1,000+
- **Finish:** Satin Chrome
- **Handing:** Reversible
- **Operation Outside:** Lever handle on code entry
- **Operation Inside:** Lever handle free exit
- **Weather Resistant:** Yes
- **Key Override:** No
- **Passage Set:** Yes
- **Width:** 55mm
- **Weight:** 2.5kg

## Key Features

- **Keyless Access Control:** Provides secure, mechanical push-button entry without the need for keys.
- **Heavy-Duty Construction:** Features Teflon-coated internal parts for enhanced durability and resistance to wear and tear.
- **Slipping Clutch Mechanism:** Protects the lock from forced entry and vandalism by allowing the handle to slip under pressure.
- **Passage Set Facility:** Allows the lock to be set to free-passage mode for unrestricted entry and exit when needed.
- **Weather Resistant:** Durable satin chrome finish makes it suitable for both internal and external installations.
- **Reversible Handing:** Easily configured to suit both left and right-handed doors.
- **Anti-Pick Plate:** Added security feature to prevent tampering and manipulation.

# Brand Profile

Lockey

**Lockey** (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

## What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

## UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
