Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2100 Series (specifically the 2210 model) is a medium-duty mechanical digital door lock featuring a robust mortice deadbolt. Designed for both internal and external applications, this weatherproof digital lock offers reliable keyless security without the need for wires, batteries, or electricity.

This non-handed, fully reversible lock is suitable for left- or right-handed doors. It features a slipping clutch mechanism on the outer knob to prevent internal damage if the handle is forced. The deadbolt is constructed with a stainless steel core shaft, and it requires a manual throwback of the thumbturn to re-lock, preventing accidental lockouts. With over 1,000 possible code combinations (using a 4 to 6 digit code length), it provides excellent security for homes, offices, and commercial premises.

Please choose your preferred finish (Black or Satin Chrome), manufacturer reference (2210 JB or 2210 SC), and weight (1.25kg or 1.28kg) from the options below.

Technical Specifications

- **Brand:** Lockey
- **Series:** 2100 Series (Model 2210)
- **Latch Type:** Mortice Deadbolt
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 55mm
- **Code Length:** 4 to 6 digits (1,000+ combinations)
- **Keypad:** 14 buttons
- **Handing:** Reversible (non-handed)
- **Weather Resistant:** Yes
- **Weight:** 1.25kg to 1.28kg (depending on option selected)
- **Finishes Available:** Black or Satin Chrome (please select below)

Key Features

- **Mechanical Keyless Entry:** Operates entirely mechanically with no batteries, wiring, or electricity required
- **Robust Deadbolt:** Features a mortice deadbolt with a durable stainless steel core shaft
- **Slipping Clutch Mechanism:** Outer knob slips when forced to protect the internal lock mechanism from damage
- **Manual Re-locking:** Requires a manual throwback of the thumbturn to lock, preventing accidental lockouts
- **Weatherproof Construction:** Suitable for both internal and external installations
- **Reversible Design:** Non-handed setup makes it suitable for both left- and right-handed doors
- **Lifetime Guarantee:** Backed by a Lockey Limited Lifetime Guarantee

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
