Product Description

The Lockey 2200 Series Digital Lock is a reliable, medium-duty mechanical digital keypad featuring a surface rim-mounted internal sliding bar. Designed for both internal and external installations, this robust lock is ideal for securing doors, cabinets, and narrow stile configurations where a standard mortice lock may not be suitable.

With its non-handed, reversible design, the Lockey 2200 can be installed as close to the edge of the door as required. It features Teflon-coated internal components to enhance operation and significantly delay natural wear and tear. Security is managed via a 14-button keypad supporting 4 to 6-digit codes, offering over 1,000 combinations. The lock operates via a thumbturn on entry of the correct code from the outside, with a free exit thumbturn on the inside, requiring a manual throwback to re-lock.

This versatile digital lock is available in multiple finishes, including Polished Brass and Satin Chrome, with weights ranging from 1.37kg to 1.41kg. Please choose your preferred finish, weight, and barcode options from the selection below.

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
