Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2230 Series (2230NL) is a front-only digital keypad designed for use with your own rim nightlatch case or internal fire exit panic hardware. This mechanical digital lock is supplied as the front keypad section only, making it an ideal choice for replacement installations or for upgrading existing narrow stile doors to keyless entry.

Operating via a digital code from the outside, it provides secure, mechanical access control without the need for keys or wiring. It is fully reversible, weather-resistant, and suitable for both internal and external doors.

This digital lock is available in multiple finishes, including Polished Brass and Satin Chrome, with weights ranging from 800g to 810g depending on your selection. Please choose your preferred finish, weight, and barcode option

from the selections below.

Technical Specifications

- **Brand:** Lockey
- **Manufacturer Reference:** 2230NL
- **Width:** 40mm
- **Door Thickness:** 35mm to 55mm
- **Case Depth Required:** 45mm

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
