Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2430DS Series Back To Back Digital Lock is a robust, double-sided mechanical digital lock designed for environments where both entry and exit require controlled access. Ideal for use on external gates, restricted internal doors, and perimeter entries, this lock features a digital keypad on both sides to ensure secure access from either direction.

Built to withstand the elements, the 2430DS is weather-resistant and suitable for both internal and external installations. It features a robust protective clutch mechanism in the thumbturns to prevent damage to the internal components if forced. The lock is non-handed and features a reversible latch, allowing for straightforward installation on both left and right-hand hung doors. Designed to fit doors between 35mm and 55mm thick, it provides a reliable, keyless security solution without the need for batteries or wiring.

Technical Specifications

- **Brand:** Lockey
- **Model:** 2430DS
- **Backset:** 60mm
- **Required Case Depth:** 85mm
- **Door Thickness:** 35mm to 55mm
- **Finish:** Satin Chrome
- **Number of Buttons:** 14
- **Code Length:** 4 to 6 digits
- **Combinations:** 1,000+
- **Handing:** Reversible (non-handed)
- **Lock Width:** 40mm
- **Weight:** 1.59kg

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
