Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2435 Series Digital Lock with Holdback is a robust and reliable mechanical digital keypad lock designed for medium-duty security. Suitable for both internal and external applications, this versatile lock features weather-resistant construction to ensure smooth operation and long-lasting durability.

A key feature of the Lockey 2435 is its convenient holdback facility, which allows the latch bolt to be held in the retracted position. This is ideal for high-traffic periods or when you need free, unrestricted passage without entering a code. The lock is fully non-handed (reversible), making it suitable for both left and right-hand hung doors. For added security, it features a protective slipping clutch mechanism to prevent damage to the lock if forced.

This digital lock is available in a choice of finishes, including Satin Chrome and Polished Brass. Please select your preferred finish from the options below.

Technical Specifications

- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 55mm
- **Code Length:** 4 to 6 digits
- **Combinations:** 1,000+
- **Number of Buttons:** 14
- **Operation Outside:** Thumbturn on entry of code
- **Operation Inside:** Thumbturn free exit
- **Holdback:** Yes
- **Key Override:** No
- **Weather Resistant:** Yes

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
