Specification Summary

Brand	Lockey
Product type	Digital Locks

Product Description

The Lockey 2435K Series Digital Lock is a robust and versatile mechanical keypad designed for both internal and external doors. Offering a perfect balance of security and convenience, this lock features a built-in key override and a holdback function, making it an excellent choice for offices, commercial premises, and residential properties.

The key override facility provides a secure manual bypass using one of the two supplied keys, ensuring emergency access or easy entry for facilities management. For periods of high traffic, the integrated holdback function allows the lock to be set to a passage-free state, permitting unrestricted entry and exit without entering a code. Built to last, the lock features a protective clutch mechanism to prevent damage from forced entry attempts and is finished in a durable, weather-resistant satin chrome.

Technical Specifications

- **Backset:** 70mm (95mm case depth required)
- **Door Thickness:** Suitable for doors 35mm to 55mm thick
- **Code Length:** 4 to 6 digits (offering over 1,000 combinations)

Brand Profile

Lockey

Lockey (often sold as **Lockey Digital** / **LockeyUSA™**) is a keyless-entry lock brand best known for **fully mechanical push-button combination locks** for **doors and gates**—the classic "no keys, no batteries, no wiring" approach that's popular for shared access, staff entrances, rental properties, and perimeter gates.

The brand story gets told slightly differently depending on region, but the consistent thread is this: **Lockey was one of the earliest "mechanical digital" (push-button) keyless lock systems**, with many trade listings calling it first introduced in **1970** and popularised with the rallying cry **"Change the code, not the lock!"**

What Lockey is known for (in the real world)

- **Mechanical keyless locks** (spring latch and deadbolt-style), designed to be **code changeable** without needing power.
- **Gate/perimeter hardware** in the same ecosystem (LockeyUSA's range is often presented alongside gate hardware like hydraulic closers and panic hardware).

UK vs North America branding / distribution

- In the UK, **Lockey Digital** is distributed by **Total Product Sales Ltd**, which says it was established in **1982** and founded by **John Fenton**, and that the Lockey Digital locks are **invented and manufactured in Japan** and distributed in the UK/worldwide since 1982.
- In North America, **LockeyUSA™** describes itself as the Lockey brand's North American business; one LockeyUSA page notes that **Doug Hill obtained exclusive North American import rights and founded LockeyUSA in 2001**.
- LockeyUSA was later acquired: **Nationwide Industries acquired LockeyUSA** (announcement dated **25 Feb 2021**), folding the brand into a broader gate-hardware portfolio.
